

Resin forming is made easy in area that has traditionally been difficult to reach.

Resin Forming Instrument with Great Comfort & Convenience To Use.

- Adopted titanium nitride coating prevents resin from sticking on surface.
- Hollow stainless steel handle with light weight (15g) reduces your hand fatigue.
- Ultra thin tip enables you to fill and form resin in area that has traditionally been difficult to reach.

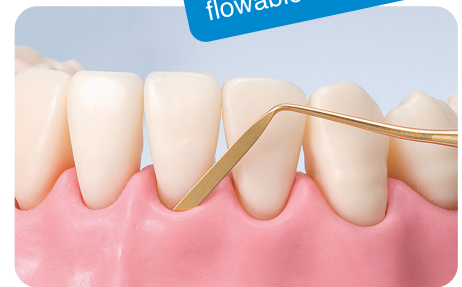

Ideal for filling and forming composite / flowable resin.

Flat Face

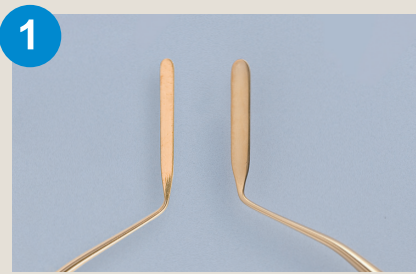

Anterior Tooth Side

Tooth Bottom Area

6 points of Fineness Lines

Check

1.5 as wide as conventional instrument.

2. Wide & short type is available, too.

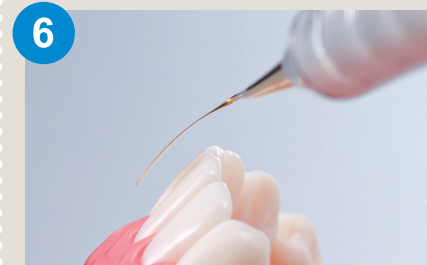

3. Resin filling for triangular hollow.

4. Narrow area between teeth can be accessed.

5. For tiny filling, removal of excessive material, use with microscope.

6. Bent form with great flexibility to securely touch tooth face.
